

# 44,000 USER HOURS

## 5-YEAR GUARANTEE

### CATHODE-GUARD

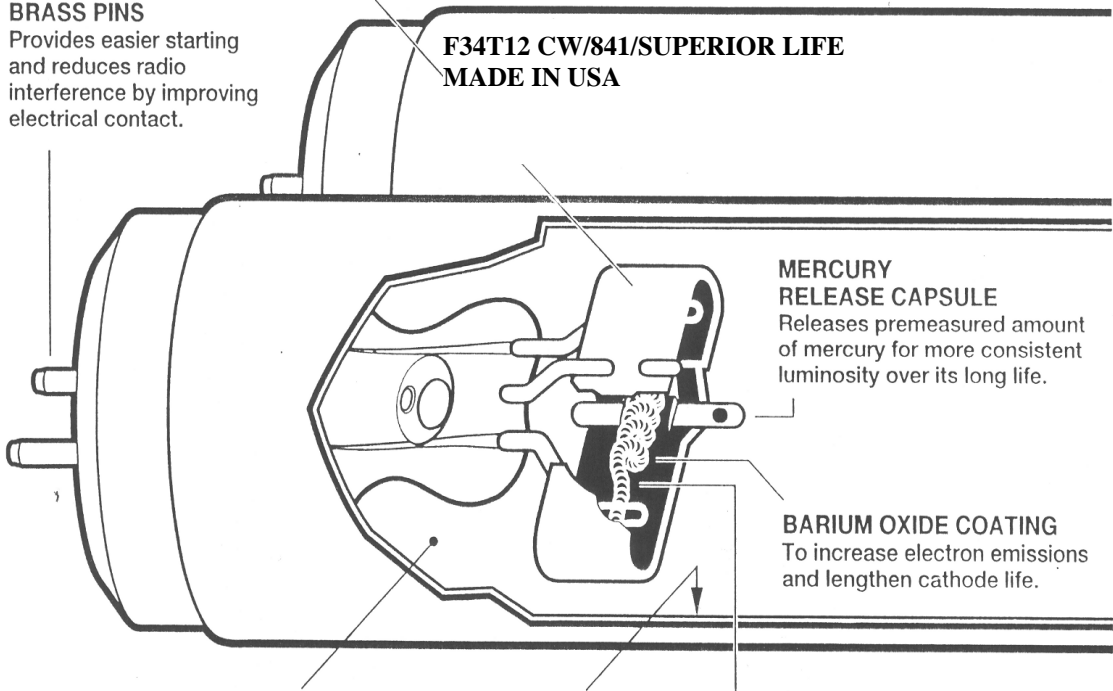

Special alloy shield retards end blackening and improves lumen maintenance.

### BRASS PINS

Provides easier starting and reduces radio interference by improving electrical contact.

- **Quality Components**
- **Tight Manufacturing Controls**

**F34T12 CW/841/SUPERIOR LIFE**  
**MADE IN USA**

### MERCURY RELEASE CAPSULE

Releases premeasured amount of mercury for more consistent luminosity over its long life.

### BARIUM OXIDE COATING

To increase electron emissions and lengthen cathode life.

### EXTENDED LIFE PHOSPHORS

Scientifically blended to reduce color shift and to maintain more consistent lumin output.

### SILICONE COATING

Improves starting in humid and damp weather.

### DOUBLE TUNGSTEN CATHODE

Made from pure tungsten, triple wound together for improved electron emissions and longer cathode life.
